WORK EXPERIENCE

From 3/2023 to 02/2024: PowerGate Software Australia - Nguyen Thi Due, Cau Giay, Ha Noi

* **Position:** Front-end Developer

* **Description:** Developed and maintained mobile apps, web applications and web components to meet customer requirements

* **Projects:**

- **DIYBA:**

+ A PropTech platform in the Australian market, designed to empower individual investors to buy real estate without a traditional buyer's agent. It provides deep market analysis, strategic search features and automated portfolio management to help users maximize profits and minimize risks

+ Tech Stack: TypeScript, ReactJS, React Native, Redux, Highcharts

+ Version control: Git

+ Platforms: Web, Android, iOS

+ Team members: 5

+ Responsibilities: Built and optimized high-fidelity interfaces based on Figma, focusing on interactive charts and statistical components to visualize investment data

- **Kōura Wealth:**

+ A digital investment platform that helps people manage their retirement savings. It allows users to create personalized investment plans based on their goals, providing a simple and modern way to track and grow their wealth

+ Tech Stack: HTML, CSS, JS, Bootstrap, ChartJS

+ Version control: Git

+ Platforms: Web

+ Team members: 4

+ Responsibilities: Created reusable interface elements from scratch using clean HTML, CSS and JS to ensure the design matches the brand's professional look perfectly. Built interactive charts and progress tracking tools to help users easily visualize their future savings

From 5/2022 to 02/2023: PowerGate Software Vietnam - Trung Kinh, Cau Giay, Ha Noi

* **Position:** Front-end Developer

* **Description:** Developed and maintained mobile apps, web applications and web components to meet customer requirements

* **Projects:**

- The Safe Track:

- + A real-time safety application designed to provide immediate notification and streamlined communication during emergencies
- + Tech Stack: TypeScript, React Native, Redux, Firebase (FCM)
- + Version control: Git
- + Platforms: Android, iOS
- + Team members: 4
- + Responsibilities: Developed and polished mobile interfaces based on Figma designs. Integrated RESTful APIs and handled complex data flows, ensuring efficient state management and synchronized data between the app and backend

- WeStack:

- + A large-scale e-commerce platform providing a user-friendly shopping experience with product discovery, secure payment processing, and order management
- + Tech Stack: TypeScript, ReactJS, React Native, Redux, Stripe API
- + Version control: Git
- + Platforms: Web, Android, iOS
- + Team members: 2
- + Responsibilities: Maintained and upgraded the existing web and mobile codebase. Worked with the client's backend team to update APIs, fix data issues and add new features

From 5/2021 to 4/2022: ITPlus Academy - Le Dai Hanh, Hai Ba Trung, Ha Noi

* **Position:** IT HelpDesk

* **Description:**

- Software Deployment: Managed the installation and configuration of Adobe Creative Cloud suite (Photoshop, Illustrator, InDesign) and various IDEs/programming environments for students
- Technical Troubleshooting: Resolved OS-level issues and software conflicts
